The reason Eastbury Comprehensive School chose the Academy Cantilever Leg IT solution was due to its integral wire management, which feeds from desk to desk through generous outlets and can accommodate both power and data sockets comfortably.

The shared leg system gives more space for students and a cost saving, desks remain joined together which is good for anti-tamper and complies with health and safety issues relating to wiring that feeds through the built in horizontal wire management.

The system carries a 10 year guarantee, a variety of finishes and accessories are available including contemporary matching glazed and etched screens (in toughened glass), CPU holders which are adjustable in size and depth to allow for an almost unlimited PC size.

Metal to metal fixings make the product extremely durable and the adjustable sliding beam allows the system to be custom made to the size of the room, also giving more longevity as it's easy to reconfigure.

## ACADEMY KITE TABLES

### Functionality

- Unique gate-leg system and patented folding mechanism
- Top remains on the frame and each table folds to a narrow 350mm profile
- Steel frame follows table shape, making it far stronger than tilt top alternatives. Also protects the top when table is folded
- Folding/locking mechanism is easily identifiable on the front rail and simple to operate.
- A folded table barely occupies more than a body width – an advantage when moving through doors and corridors
- Each shape folds the same way and nests together when not in use
- Dual-locking castor eliminates movement and negates the need for a linking device
- Unique leveling facility on each castor allows for 50mm of height adjustment; a big help in rooms with uneven floors
- Tables can be cable-managed and fitted with modesty panels at any time, adding to their versatility
